

Prepped & Ready

Annual budgeting made easy

nue

3-Step Budgeting

Designed uniquely for government contractors, Nue helps you prepare budgets that are DCAA compliant and ready for management, bankers, and board members – fast.

Cut the budget process down by 50% and up to 70% for future years

1. Retrieve the data you need from Unanet

Select the data you want from one screen and retrieve data on demand. Pull in actual results, setup data, and forecast data. When you use Unanet Project Portfolio, project plans will tie directly to your Nue budgets providing additional contract waterfall reporting.

2. Enter assumptions for your pipeline, fixed assets, and working capital

3. Enter the Basis of Estimates (BOEs)

Select from 32 different BOEs for the Income Statement and Balance Sheet with additional input variables for a broad range of estimating options.
